

3MA 3- band mobile antenna - 10m full size wave/4 whip - quick tilt-down system for 20 and 15 m loading coil change - lower losses and better efficiency than conventional base-loaded car antenna verticale tipo frusta, tribanda ,con carico centrale ed avente minori perdite e maggiore efficienza della classica a caricamento di base-veloce sistema di cambio banda.Quarto d'onda intero sui 10m

Caratteristiche

Copertura: banda 10 m (1/4 d'onda)

banda 15 m (bobina intercambiabile)

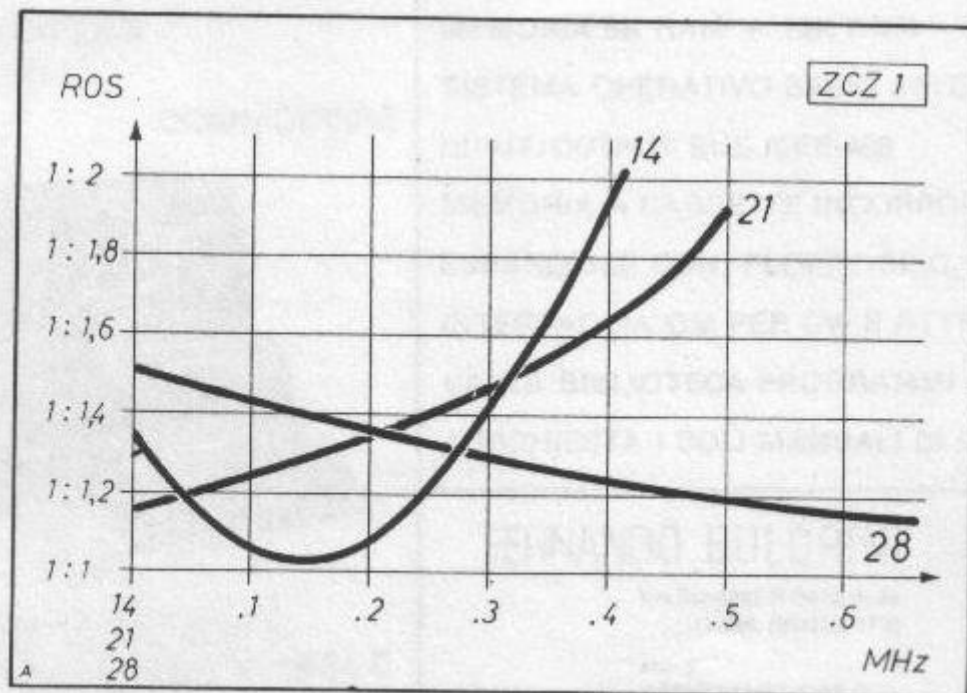

banda 20 m (bobina intercambiabile)

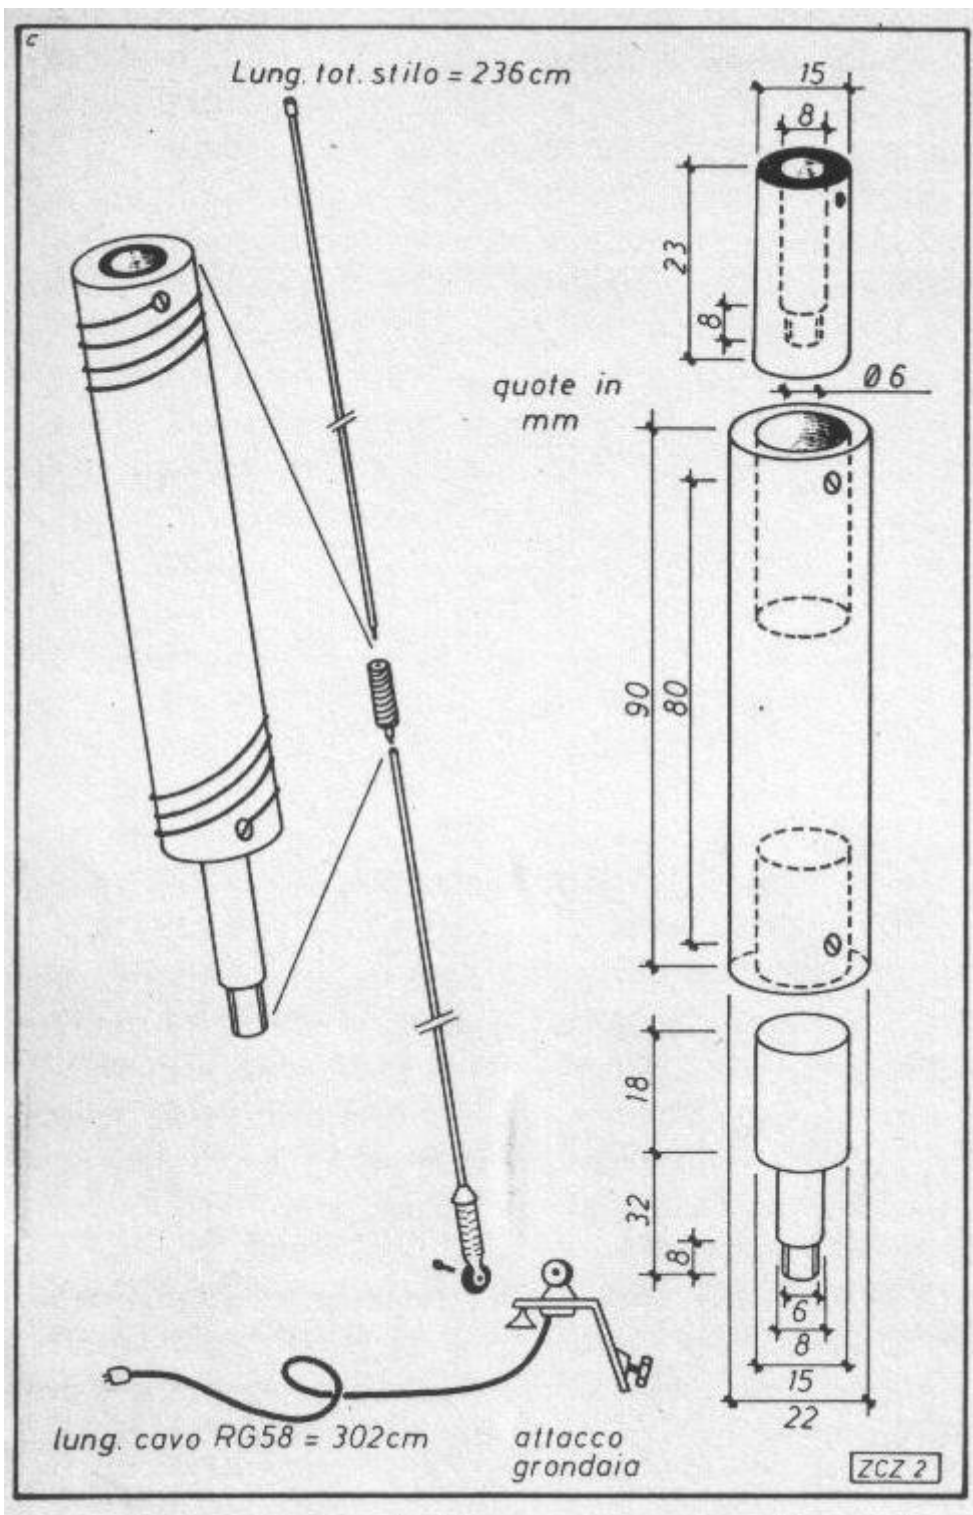

R.O.S. = 1 : 1,2 o migliore (alla risonanza)

Banda passante = circa 500 kHz (con ROS 1:2)

Lunghezza = 236 cm

Potenza applicabile = 100 watt.

10m = no coil ; 15m = 22 turns (spaced), 1mm wire diam, coil length = 80mm ; 20m = 37 turns same wire and coil length.
